Betafit
Filter Elements

QUALITY AND PERFORMANCE FROM HYDAC

HYDAC Betafit® filter elements safeguard the performance and long life of important and expensive hydraulic components through their high quality standard. They have the same quality and performance standards as original HYDAC elements.

These are:

- High β_x values
- High β_x stability
- High contamination retention capacity
- High collapse/burst pressure
- Low initial differential pressure
- Universal applications
- Good flow fatigue resistance

PRICE / PERFORMANCE RATIO

When buying a filter, cost is a decisive factor. Our BETAFIT® filter elements are therefore very competitively priced. However, HYDAC also recommends calculating the long-term cost savings achieved by using an especially efficient filter with a high contamination retention capacity and the high cleanliness level of the hydraulic fluid which results. If these factors are included in the cost/benefit calculation, HYDAC products show an excellent price performance ratio.

QUALITY ASSURANCE

Regular measurements of filter element performance data and continuous quality control checks guarantee the high quality standard at HYDAC (ISO 9001).

FAST DELIVERY

HYDAC distributors are at your disposal all over the world to advise you on the appropriate selection of elements. HYDAC supports the agents with an additional stock of BETAFIT® replacement elements. There are BETAFIT® production plants in both Germany and the USA.

SELECTION PROCEDURE

The manufacturers are listed in alphabetical order. Your HYDAC distributor will gladly discuss your current filter usage with you and will recommend a suitable replacement element.

The information on BETAFIT® replacement elements contained in this introduction is a service for our customers and the information is current at the time of printing. HYDAC does not guarantee the accuracy, whether specific or implied, of the information given here for element replacement. For problematical applications, please contact HYDAC.

TECHNICAL SPECIFICATIONS

- Permissible Δp across the element:
 - 20 bar for Betamicron® (BN)
(exception: 1.06...: 10 bar)
 - 10 bar for ECOmicron® (ECO/N)
 - 210 bar for Betamicron® (BH)
- Temperature range:
 - Betamicron® = -30 °C to +100 °C
 - ECOmicron® = -10 °C to +100 °C
- Compatibility with fluids:
 - Mineral oils
 - Non-flam fluids and fluids containing water
 - Rapidly biodegradable fluids
 - Special fluids
(Test criteria to ISO 2943)
- Flow fatigue resistance to ISO 3724:
High flow fatigue resistance due to solid filter material support on both sides and high inherent strength of filter materials.

NOTE

The information in this brochure relates to the operating conditions and applications described.

For applications or operating conditions not described, please contact the relevant technical department.
