Over-Pressurized Lube Oil Filters

From time to time every filter manufacturer has had a filter that has been severely over-pressurized returned from a customer. Often the deformed filter is the only sign the car owner has that a problem existed in their lube oil system.

It's possible that the damaged filter was not noticed until it was removed during the next scheduled oil change. However, if the pressure was sufficient to blow out the gasket or unroll the lockseam, the car owner may have experienced immediate and costly problems.

With the "evidence" in their hands, they tend to put the blame on the damaged filter. It's not surprising that they are more than a little aggravated when the filter manufacturer denies any responsibility for the damage. What, then, has caused the over-pressurization?

A look at how a lube oil system functions will show that oil pressure is created by the oil pump. The upper limit of this pressure is controlled by a pressure regulating valve, which is usually an integral part of the pump.

Figure 1 is a simplified diagram of the lube oil system showing the pump, regulating valve, filter and bearings.

The pump supplies sufficient flow to lubricate the bearings and other moving parts of the engine. This oil must be under pressure if it is to properly separate the highly loaded parts of an engine and prevent excessive wear. The purpose of the regulating valve is to provide this pressure, which on most passenger cars is between 40 PSI (280kPa) and 60 PSI (410kPa).

The regulating valve is made up of a ball or plunger, which regulates pressure with the aid of a spring. The spring is calibrated so that the plunger will lift off its seat when the oil pressure reaches the desired amount. Once the valve is open, the pressure remains fairly constant with only small changes occurring as the engine speed varies.

The filter and all other components in the lube system are subjected to the pressure established by the regulating valve. If this pressure is excessive, filter damage may occur. This is the point that many people who are not familiar with lube systems fail to realize.

What can cause the pressure in the system to exceed the regulating valve setting? The answer is that either the valve must be stuck in the closed position or it is sluggish and slow to move to the open position after the engine has started.

Figure 2 shows the system operating with the regulating valve stuck in the shut position. Under these conditions the pressure builds up equally on all components in the system until something happens to relieve the pressure. If the regulating valve becomes unstuck, the pressure will return to normal.

Normal operating pressure causes no permanent deformation of the filter body. When the system pressure reaches 150 PSI (1,000 kPa) due to a faulty regulating valve, most filters become permanently deformed. At this pressure, the gasket usually will not blow out and the lockseam will remain sound.

If the regulating valve still remains stuck, the pressure will increase further and the gasket between the filter and the base can be blown out. This will probably cause the loss of all the oil in the system.

If the filter has been installed on the tight side, the gasket may not blow out and the lockseam will unwind as the pressure continues to rise.

The main point is that the deformed filter is not the cause of this excessive pressure, but the victim of a faulty regulating valve.

If the customer is alert and shuts the engine off at the first sign of trouble (red light on or reduced oil pressure), they can limit their loss to a tow job, oil change and new filter. If the vehicle continues to be driven, engine failure is probable.

The customer may ask if a plugged filter could have caused the over-pressurized condition. The answer is no; if the regulating valve is functioning properly, it will maintain the pressure on the filter at 40 PSI (280 kPa) or 60 PSI (410 kPa) even if the filter is plugged.

In summary, if a lube filter distorts due to excessive pressure in the system, the fault lies with the oil pump pressure regulating valve and not with the filter.

Filtres à huile lubrifiante surpressurisés

De temps à autre, chaque fabricant de filtres rencontre un filtre qui a été sévèrement surpressurisé et retourné par un client. Souvent, le filtre déformé constitue le seul indice que le propriétaire de la voiture possède pour lui indiquer un problème dans son système d'huile lubrifiant.

Il est possible que le filtre endommagé ne soit pas remarqué avant la prochaine vidange d'huile. Si, toutefois, la pression a été suffisante pour déloger le joint ou dérouler le joint d'arrêt, le propriétaire de la voiture peut faire face à des problèmes immédiats et coûteux.

Avec la «preuve» en main, il aura tendance à mettre le blâme sur le filtre endommagé. Il n'est pas surprenant qu'il soit plus qu'irrité lorsque le fabricant de filtres nie toute responsabilité pour les dommages. Alors, qu'est-ce qui a causé la surpressurisation?

Un coup d'oeil sur la façon dont un système d'huile lubrifiante fonctionne démontre que la pression d'huile est engendrée par la pompe à huile. La limite la plus élevée de cette pression est contrôlée par une soupape régulatrice de pression laquelle est normalement incorporée à la pompe.

L'illustration 1 constitue un schéma simplifié du système d'huile lubrifiante; on y voit la pompe, la soupape régulatrice, le filtre et les coussinets.

La pompe fournit un débit suffisant pour lubrifier les coussinets et autres pièces mobiles du moteur. Cette huile doit se trouver sous pression afin de séparer adéquatement les pièces lourdes du moteur et prévenir une usure excessive. Le but de la soupape régulatrice est de fournir cette pression, laquelle, sur la plupart des voitures de tourisme, est de 40 à 60 lb/po². La soupape régulatrice est composée d'une bille, ou plongeur, qui contrôle la pression à l'aide d'un ressort. Le ressort est calibré de façon à permettre au plongeur de se soulever de son siège lorsque la pression d'huile atteint un niveau voulu. Une fois la soupape ouverte, la pression demeure passablement uniforme avec seulement quelques variations suivant la vitesse du moteur.

Le filtre, de même que tous les autres organes du système lubrifiant, sont soumis à la pression établie par la soupape régulatrice. Si cette pression devient excessive, le filtre peut être endommagé. Pour certaines personnes ne connaissant pas les systèmes lubrifiants, cette situation est difficile à comprendre.

Quelle est la cause de cet excès de pression par rapport au réglage de la soupape régulatrice? La réponse: soit la soupape est coincée en position fermée, soit elle est lente et prend trop de temps à s'ouvrir une fois que le moteur a démarré.

L'illustration 2 présente le système fonctionnant avec la soupape régulatrice coincée en position fermée. Dans ces conditions, la pression s'accumule également sur tous les organes du système jusqu'à ce qu'il se produise quelque chose pour dégager la pression. Si la soupape régulatrice se décoince, la pression revient à la normale. Si elle demeure coincée, un bris se produira.

Une pression de fonctionnement normale ne cause aucune déformation permanente sur le corps du filtre. Lorsque la pression du système atteint 150 lb/po² par suite d'une défectuosité dans la soupape régulatrice, la plupart des filtres se déforment d'une façon permanente. À ce niveau de pression, le joint ne lâchera pas et le joint d'arrêt restera en bon état.

Si la soupape régulatrice demeure toujours coincée, la pression augmentera de plus en plus et le joint se trouvant entre le filtre et la base peut lâcher, ce qui causera la perte de toute l'huile dans le système.

Si le filtre a été installé bien serré, le joint peut ne pas lâcher et le joint d'arrêt se déroulera alors que la pression continue de monter.

Si le client est vif et qu'il éteint le moteur au premier signe de problème (voyant rouge allumé ou pression d'huile réduite), il peut limiter les dégâts et s'en tirer avec un simple remorquage de son véhicule, une vidange d'huile et un nouveau filtre. S'il conduit la voiture à la station-service la plus proche, le moteur surchauffera probablement à cause du manque d'huile. Le point le plus important à se rappeler est que le filtre déformé n'est pas la cause de cette pression excessive, mais plutôt le résultat d'une soupape régulatrice défectueuse.

Le client demandera probablement si un filtre complètement bouché peut être la cause des conditions de surpression dans le système. La réponse est non. Si la soupape régulatrice fonctionne adéquatement, elle maintiendra la pression au filtre de 40 à 60 lb/po², même si le filtre est bouché.

En conclusion, si un filtre se déforme par suite d'une surpression dans le système, le problème provient de la soupape régulatrice et non du filtre.

Filtros de Aceite Sobrepresurizados

De vez en cuando todos los fabricantes de filtros han recibido de algún cliente un filtro que ha sido severamente sobrepresurizado. A menudo el filtro deformado (abombado) es la única señal que el propietario del carro tiene de que existió un problema en su sistema de lubricación de aceite.

Es posible que el filtro dañado no haya sido notado hasta que fue removido del vehículo en el siguiente cambio de aceite. Sin embargo, si la presión fue suficiente como para sacar la junta del carril o desengargolar la unión del bote, el propietario del carro habrá experimentado problemas inmediatos y costosos.

Con la "evidencia" en sus manos él culpa al filtro dañado. No es de sorprenderse que esté más que un poco irritado cuando el fabricante del filtro niega o rechaza cualquier responsabilidad en el daño. Entonces, ¿Que es lo que ha causado la sobrepresurización?

Al revisar como funciona el sistema de lubricación, vemos que la presión de aceite es creada por la bomba de aceite. El límite superior de esta presión está controlado por una válvula reguladora de presión, la cual, usualmente es una parte integral de la bomba.

La figura 1 es un diagrama simplificado del sistema de lubricación que muestra la bomba, la válvula reguladora, el filtro y las chumaceras. La bomba suministra suficiente flujo para lubricar las chumaceras y las demás partes en movimiento del motor. El aceite debe estar bajo presión para separar las partes altamente cargadas del motor y prevenir el desgaste excesivo. El propósito de la válvula es regular esta presión, que en muchos carros de pasajeros está entre 40 psi (280 kPa) y 60 psi (410 kPa).

La válvula reguladora está compuesta por una esfera o un pistón que regula la presión con la ayuda de un resorte. El resorte está calibrado de tal manera que el pistón se levante de su asiento cuando la presión del aceite alcanza el valor deseado. Una vez que la válvula está abierta, la presión se mantiene prácticamente constante, con pequeñas variaciones debidas a la velocidad de giro del motor.

El filtro y todos los demás componentes del sistema de lubricación están sujetos a la presión establecida por la válvula reguladora. Si la presión es excesiva, puede ocurrir un daño en el filtro. Este es el punto que muchas personas que no están familiarizadas con el sistema de lubricación no toman en cuenta.

¿Que puede causar que la presión en el sistema exceda el ajuste de la válvula reguladora?. La respuesta es que la válvula debe haberse quedado pegada en posición cerrada o ésta se mueva muy lentamente a la posición de abierta después de que el motor ha arrancado.

La figura 2 muestra el sistema operando con la válvula de regulación pegada en la posición cerrada. Bajo esas condiciones la presión se incrementa igualmente en todos los componentes del sistema hasta que algo ocurre que libera la presión. Si la válvula de regulación se despega, la presión regresa a su valor normal. Si permanece pegada algo tendrá que romperse.

La presión de operación normal no causa deformaciones permanentes en el cuerpo del filtro. Cuando debido a la falla de la válvula reguladora, la presión del sistema alcanza 150 psi (1,000 kPa), la mayoría de los filtros se deforman permanentemente. A esta presión, la junta permanece en su carril y el engargolado del bote continúa sin fuga.

Si la válvula reguladora continúa pegada, la presión se incrementará y la junta entre el filtro y la base puede zafarse, esto probablemente causará la pérdida de todo el aceite del sistema.

Si el filtro se instaló muy apretado, la junta permanecerá en su lugar y el bote se desengargolará conforme la presión continúe subiendo.

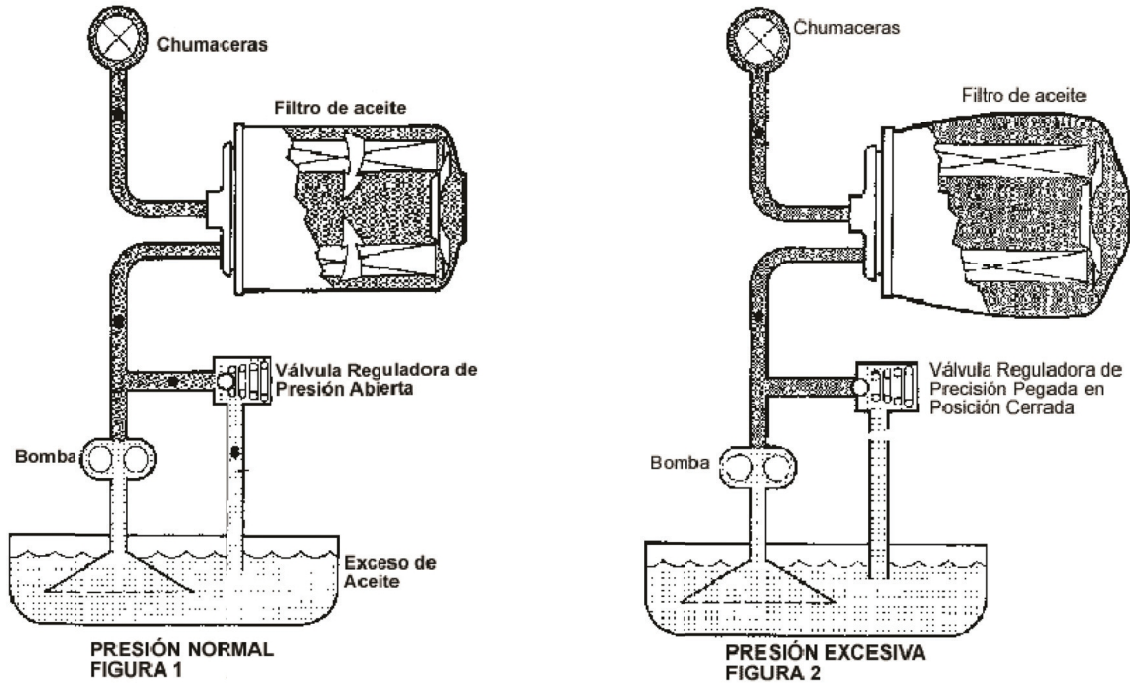

Si el cliente está alerta y apaga el motor a la primera señal del problema (encendido de la luz roja o baja presión de aceite en el indicador), limitará su pérdida a un trabajo arrastre al taller, cambio de aceite y un filtro nuevo.

Si él continua la marcha hasta el taller más cercano, probablemente quemará el motor debido a la falta de aceite.

El punto principal es que el filtro deformado no es la causa de la presión excesiva, sino la víctima de una válvula reguladora defectuosa.

El cliente pudiera preguntar si un filtro completamente tapado puede causar las condiciones de sobrepresión en el sistema. La respuesta es no. Si la válvula reguladora está funcionando adecuadamente, ésta mantendrá la presión en el filtro a 40 psi (280 kPa) o 60 psi (410 kPa) aún si el filtro estuviera tapado.

En resumen, si un filtro se deforma debido a la sobrepresión en el sistema, la falla está en la válvula reguladora de presión y no en el filtro.

Filter Knowledge, Unfiltered

Technical Service Bulletin 85-1

Manufacturers' Warranty

Consumer purchasers of filters are sometimes told that an aftermarket brand of replacement filter cannot be used in the consumer's vehicle during the warranty period. The claim is made that use of an aftermarket brand will "void the warranty," with the statement or implication that only the original equipment brand of filters may be used. This tends to cast doubt on the quality of the aftermarket filter.

That claim is simply not true. If the consumer asks for the statement in writing, they will not receive it. Nevertheless, the consumer may feel uneasy about using replacement filters that are not original equipment. With the large number of consumers who prefer to use an aftermarket filter this misleading statement should be addressed.

Under the federal Magnuson-Moss Warranty Act, the Clean Air Act and general principles of the U.S. Federal Trade Commission Act, a manufacturer may not require the use of any brand of filter (or any other article) unless the manufacturer provides the item free of charge under the terms of the warranty.

If the consumer is told that only the original equipment filter will not void the warranty, they should request that the OE filter be supplied free of charge. If they are charged for the filter, the manufacturer may be violating the Magnuson-Moss Warranty Act or other applicable law.

By providing this information to consumers, the members of the Filter Manufacturers Council (FMC) intend to combat the erroneous claim that the use of a brand of replacement filter other than original equipment will "void the warranty."

It should be noted that the Magnuson-Moss Warranty Act is a U.S. federal law that applies to consumer products. The U.S. Federal Trade Commission has authority to enforce the Magnuson-Moss Warranty Act, including obtaining injunctions and orders containing affirmative relief. In addition, a consumer can bring suit under the Magnuson-Moss Warranty Act.

Garantie du fabricant

Il arrive parfois chez un concessionnaire automobile qu'un préposé à la clientèle ou un mécanicien dise aux acheteurs de filtres d'automobiles de ne pas utiliser une certaine marque de filtre de rechange sur leur véhicule pendant la période de garantie, à l'effet que l'utilisation de cette marque «annulera la garantie», signifiant ou insinuant ainsi que seul l'emploi de la marque de filtre de l'équipement d'origine est acceptable. Il va sans dire que cette affirmation est de nature à semer le doute sur la qualité des filtres de rechange.

En fait, cette affirmation est tout simplement fausse. Si le consommateur en demandait une version écrite, il n'en recevrait aucune. Cependant, il peut se demander s'il fait un mauvais choix en utilisant des filtres de rechange qui ne sont pas de l'équipement d'origine. Comme il y a nombre élevé de bricoleurs qui préfèrent poser leurs propres filtres, cette affirmation erronée doit être rectifiée.

Selon la loi sur la garantie Magnuson-Moss Warranty Act et les principes généraux de la U.S. Federal Trade Commission Act, un fabricant ne peut exiger l'utilisation d'une marque de filtre quelconque (ou d'un autre article) à moins d'offrir cet article gratuitement en vertu de la garantie.

Donc, si le consommateur se fait dire que seul le filtre d'équipement d'origine n'annulera pas la garantie, il devrait exiger que ce filtre d'équipement d'origine lui soit offert gratuitement. Si on lui demande de payer ce filtre, le fabricant devient alors en infraction à la loi sur la garantie Magnuson-Moss ou à une autre loi qui s'applique.

En fournissant ce renseignement aux consommateurs, le Conseil des fabricants de filtres désire aider à combattre l'affirmation mensongère qu'une marque de filtre de rechange autre que celle offerte sur l'équipement d'origine «annule la garantie».

Il est important de noter que la loi sur la garantie Magnuson-Moss est une loi fédérale américaine concernant les produits de grande consommation. La U.S. Federal Trade Commission est habilitée à appliquer la loi sur la garantie Magnuson-Moss, y compris à demander des injonctions ou des ordonnances dans lesquelles il y a des mesures réparatrices. De plus, un consommateur peut entamer des poursuites en vertu de la loi sur la garantie Magnuson-Moss.

Garantías de los Fabricantes

Algunas veces, los jefes del departamento mecánico o de servicio de las agencias les dicen a los consumidores que compran filtros automotrices, que no puede usarse, en el vehículo del consumidor, una marca de reemplazo durante el período de garantía. La exigencia es hecha en el sentido de que el uso de tal marca "anulará la garantía" y con la implicación de que sólo la marca original puede ser usada. Esto, por supuesto, tiende a sembrar una duda acerca de la calidad del filtro de reemplazo.

Esto simplemente no es cierto. Si el consumidor pide esto por escrito no lo recibirá. No obstante, el consumidor pudiera no sentirse a gusto al usar filtros de reemplazo que no sean marca original. Con el gran número de consumidores que prefieren hacer ellos mismos el cambio de filtros, esta engañosa exigencia debe ser aclarada.

Bajo el Acta de Garantías Magnuson-Moss y los principios generales del Acta de la Comisión Federal de Comercio, un fabricante no puede exigir el uso de cualquier marca de filtro (o cualquier otro artículo) a menos que el fabricante proporcione el artículo libre de cargo bajo los términos de la garantía.

De esta forma, si al consumidor se le dice que sólo el uso del filtro original no anulará la garantía, él debe exigir que el filtro original sea suministrado sin costo. Si a él se le cobra el filtro, el fabricante del vehículo estará violando el Acta de Garantías Magnuson-Moss u otras leyes aplicables.

Al proporcionar esta información a los consumidores, el FMC puede ayudar a combatir la errónea exigencia de que un filtro de reemplazo, diferente al original, "anulará la garantía".

Debe hacerse notar, que el Acta de Garantías Magnuson-Moss es una ley federal que aplica a productos de consumo. La Comisión Federal de Comercio tiene la autoridad para hacer cumplir el Acta de Garantías Magnuson-Moss, incluyendo la liberación de órdenes. Además, un consumidor puede solicitar un juicio amparado en el Acta de Garantías Magnuson-Moss.

MANN+HUMMEL Filtration Technology US LLC

Limited Warranty

Any new vehicle and equipment warranties you may have are not affected by your use of WIX filters or this limited warranty.

MANN+HUMMEL Filtration Technology US LLC warrants each WIX filter to be free from defects in material and workmanship during the period of service life recommended by the engine or equipment manufacturer. This warranty does not apply if the filter has been improperly installed, altered, abused, neglected or damaged. This warranty also does not apply if the filter has been used for non-approved or non-recommended applications or if used in competitive racing, on modified high performance engines or in any aircraft or aviation application.

If your WIX filter is found to be defective in material or workmanship during the period of service life recommended by the engine or equipment manufacturer, MANN+HUMMEL Filtration Technology will replace the defective filter with another WIX filter. In addition, MANN+HUMMEL Filtration Technology will reimburse you for the reasonable costs of the parts and labor required to repair your engine or equipment to the extent the damage was solely attributable to a defect in your WIX filter.

In order to obtain engine or equipment repairs under the warranty, you must, within 30 days after discovery of damage, submit a claim to any WIX representative, our WIX distributor or directly to the address below. You must also allow the WIX Technical Service Department to examine the filter and, if required, the engine or equipment, to determine the extent of damage and whether it was caused by a defective WIX filter. You should retain a copy of your service records and installation record and receipt as proof of the date of purchase. The filter must be returned to WIX Technical Service Department, unaltered, for examination, along with proof of purchase, service and installation records.

THIS WARRANTY IS EXCLUSIVE OF ANY OTHER WARRANTY, EXPRESS OR IMPLIED. For WIX filters used in commercial applications, and except where prohibited by applicable law, WE EXPRESSLY DISCLAIM, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. ANY IMPLIED WARRANTIES ARE LIMITED TO THE DURATION OF THIS WARRANTY. THE FOREGOING IS THE ENTIRE AND EXCLUSIVE LIABILITY OF MANN+HUMMEL FILTRATION TECHNOLOGY US LLC AND YOUR EXCLUSIVE AND SOLE REMEDY FOR ANY DAMAGES OR CLAIMS MADE IN CONNECTION WITH THE USE OF A WIX FILTER. MANN+HUMMEL FILTRATION TECHNOLOGY US LLC SHALL IN NO EVENT BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES WHATSOEVER, INCLUDING CLAIMS FOR LOSS OF USE OF THE EQUIPMENT ON WHICH THE WIX FILTER IS INSTALLED, LOSS OF TIME, INCONVENIENCE OR COMMERCIAL LOSS. Some states and other local jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusion may not apply to you.

This warranty gives you specific legal rights and you may also have other rights, which vary from state to state and other local jurisdictions.

MANN+HUMMEL Filtration Technology US LLC

Garantie limitée

Les garanties des véhicules et équipements neufs que vous possédez restent en vigueur lorsque des filtres WIX ou cette garantie limitée sont utilisés.

MANN+HUMMEL Filtration Technology US LLC garantit que chaque filtre WIX restera exempt de tout défaut de matériaux et de fabrication pendant toute la durée utile recommandée par le fabricant du moteur ou de l'équipement. La présente garantie ne s'applique pas si le filtre a été mal installé ou modifié, a subi des abus ou des dégâts, ou a été négligé ou endommagé. La présente garantie ne s'applique pas non plus si le filtre a été utilisé pour des utilisations non approuvées ou non recommandées ni pour des compétitions sportives, sur des moteurs hautes performances modifiés ou pour toute application aérienne ou aéronautique.

S'il s'avère qu'un filtre WIX fait l'objet d'un défaut de matériaux ou de fabrication pendant toute la durée utile recommandée par le fabricant du moteur ou de l'équipement, MANN+HUMMEL Filtration Technology remplacera le filtre défectueux par un autre filtre WIX. De plus, MANN+HUMMEL Filtration Technology remboursera les coûts raisonnables des pièces et de la main-d'œuvre requis pour réparer le moteur ou l'équipement sous réserve que les dégâts soient uniquement attribuables à un défaut du filtre WIX.

Afin d'obtenir la réparation du moteur ou de l'équipement en vertu de la présente garantie, le client doit dans les trente jours de la découverte du défaut présenter une réclamation à un représentant WIX, au distributeur WIX ou directement à l'adresse ci-dessous. Le client doit aussi permettre au Service technique de WIX d'examiner le filtre en question et, le cas échéant, le moteur ou l'équipement, afin de déterminer l'étendue des dégâts et si ces derniers ont été occasionnés par un filtre WIX défectueux. Le client doit conserver une copie des documents de la réparation et de l'installation, ainsi que le reçu comme preuve de la date d'achat. Le filtre non modifié doit être expédié au Service technique de WIX, en vue de son examen, et doit être accompagné de la preuve d'achat et des documents de réparation et d'installation.

LA PRÉSENTE GARANTIE EXCLUT TOUTE AUTRE GARANTIE, IMPLICITE OU EXPLICITE. Pour les filtres WIX utilisés dans des utilisations commerciales, et sous réserve que cela ne soit pas interdit par des lois en vigueur, WIX REFUSE EXPRESSÉMENT, SANS AUCUNE RESTRICTION, LES GARANTIES IMPLICITES DE QUALITÉ MARCHANDE OU DE CONFORMITÉ À UN USAGE PARTICULIER. TOUTE GARANTIE IMPLICITE SE LIMITE À LA DURÉE DE LA PRÉSENTE GARANTIE. CE QUI PRÉCÈDE CONSTITUE LA RESPONSABILITÉ ENTIÈRE ET EXCLUSIVE DE MANN+HUMMEL FILTRATION TECHNOLOGY US LLC, AINSI QUE LE SEUL RECOURS EXCLUSIF DE L'ACHETEUR POUR TOUTS DÉGÂTS OU POUR TOUTE RÉCLAMATION PRÉSENTÉE EN RAPPORT À L'UTILISATION D'UN FILTRE WIX. MANN+HUMMEL FILTRATION TECHNOLOGY US LLC NE SERA EN AUCUN CAS RESPONSABLE D'AUCUNS DOMMAGES SPÉCIAUX, DIRECTS OU INDIRECTS QUELCONQUES, Y COMPRIS FACE À TOUTE RÉCLAMATION POUR PERTE D'UTILISATION DE L'ÉQUIPEMENT SUR LEQUEL LE FILTRE WIX EST INSTALLÉ, PERTE DE TEMPS, GÊNE OU PRÉJUDICE COMMERCIAL. Certains états ou provinces et d'autres juridictions locales ne permettent pas l'exclusion ni la restriction des dommages directs ou indirects; les dispositions ci-dessus peuvent donc ne pas s'appliquer dans votre cas.

La présente garantie vous donne des droits légaux et vous pouvez aussi avoir d'autres droits qui peuvent varier d'un état, d'une province ou d'une juridiction locale à l'autre.

Révision 06/16

Notre garantie limitée WIX indiquée ci-dessus ne couvre pas les produits WIX Industrial Filtration®, WIX Racing® ou ecoLAST®, ni les produits vendus en République du Mexique. Visitez <http://wixfilters.com/warranty> pour voir les garanties qui s'appliquent aux produits WIX Industrial Filtration®, WIX Racing®, ecoLAST® et en République du Mexique, ainsi que les traductions en français et en espagnol. Pour plus de détails, contactez le directeur des ventes de votre région ou appelez l'équipe de renseignements sur les produits au numéro indiqué au début de ce catalogue.

MANN+HUMMEL Filtration Technology US LLC

Garantía Limitada

Cualesquiera nuevas garantías de vehículo y equipo que pueda tener no son afectadas por su uso de filtros WIX o esta garantía limitada.

MANN+HUMMEL Filtration Technology US LLC garantiza que cada filtro WIX está libre de defectos en material y mano de obra durante el periodo de vida de servicio recomendado por el fabricante del motor o equipo. Esta garantía no aplica si el filtro ha sido inapropiadamente instalado, alterado, abusado, descuidado o dañado. Esta garantía tampoco aplica si el filtro ha sido usado para aplicaciones no aprobadas o no recomendadas o si es usado en carreras competitivas, sobre motores modificados de alto desempeño o en cualquier aplicación de aeronave o aviación.

Si se encuentra que su filtro WIX es defectuoso en materiales o mano de obra durante el periodo de vida de servicio recomendado por el fabricante del motor o equipo, MANN+HUMMEL Filtration Technology reemplazará el filtro defectuoso con otro filtro WIX. Adicionalmente, MANN+HUMMEL Filtration Technology le reembolsará los costos razonables de las partes y mano de obra requeridos para reparar su motor o equipo en la medida en que el daño fuera atribuible solamente a un defecto en su filtro WIX.

Para obtener reparaciones de motor o equipo bajo la garantía, usted debe, dentro de 30 días después del descubrimiento del daño, presentar una reclamación a cualquier representante WIX, a nuestro distribuidor WIX o directamente a la dirección más adelante. Usted también debe permitir al Departamento de Servicio Técnico de WIX examinar el filtro y, si se requiere, el motor o equipo, para determinar la medida del daño y si fue causado por un filtro WIX defectuoso. Usted debe guardar una copia de sus registros de servicio y del registro de instalación y recibo como prueba de la fecha de compra. El filtro debe ser devuelto al Departamento de Servicio Técnico WIX, sin alterar, para examen, junto con el comprobante de compra y registros de servicio e instalación.

ESTA GARANTÍA EXCLUYE CUALQUIER OTRA GARANTÍA, EXPRESA O IMPLÍCITA. Para los filtros WIX usados en aplicaciones comerciales, y excepto cuando esté prohibido por la ley aplicable, EXPRESAMENTE NEGAMOS, SIN LIMITACIÓN, LAS GARANTÍAS IMPLÍCITAS DE COMERCIALIZACIÓN Y APTITUD PARA UN PROPÓSITO PARTICULAR. CUALESQUIERA GARANTÍAS IMPLÍCITAS SE LIMITAN A LA DURACIÓN DE ESTA GARANTÍA. LO ANTERIOR ES LA RESPONSABILIDAD TOTAL Y EXCLUSIVA DE MANN+HUMMEL FILTRATION TECHNOLOGY US LLC Y SU RECURSO EXCLUSIVO Y ÚNICO POR CUALESQUIERA DAÑOS O DEMANDAS HECHAS EN RELACIÓN CON EL USO DE UN FILTRO WIX. MANN+HUMMEL FILTRATION TECHNOLOGY US LLC EN NINGÚN CASO SERÁ RESPONSABLE POR CUALESQUIERA DAÑOS ESPECIALES, INCIDENTALES O CONSECUENCIALES, INCLUYENDO DEMANDAS POR PÉRDIDA DE USO DE EQUIPO EN EL QUE EL FILTRO WIX SEA INSTALADO, PÉRDIDA DE TIEMPO, INCONVENIENCIA O PÉRDIDA COMERCIAL. Algunos estados y otras jurisdicciones locales no permiten la exclusión o limitación de daños incidentales o consecuenciales, por lo que las limitaciones o exclusión anteriores pueden no aplicar a usted.

Esta garantía le da derechos legales específicos y usted también puede tener otros derechos, que varían de estado en estado y otras jurisdicciones locales.
